## **IN THE SPECIFICATION:**

Page 1, between lines 4 and 5 (underneath the title), insert – Background of the Invention –;

Revise Page 2, line 20- Page 3, line 4 to read as follows:

Summary of the Invention

The goal of the invention is therefore to modify a system according to the species as presented in Claim 1 in such a way as to provide a sensitive and precise adjustment of the rotating cam in the system.

According to the invention, the goal is achieved by the combination of features herein of Claim 1. To this end, both the rotating cams as well as the limit switches are combined into one constructional unit. This complete unit is preferably able to be inserted or clipped on, this enabling easy installation. In many cases, it is able to be easily removed, appropriately adjusted, and then moved to its operating position. As a result, the corresponding rotating cams are able to be adjusted extremely precisely.

Advantageous embodiments of the invention <del>based on the main claim</del> are described <u>herein</u> in the following subclaims. –;

Page 4, between lines 2 and 3 insert - Brief Description of the Drawings -; and

between lines 8 and 9 insert - Description of the Preferred Embodiments -.
